

Getting Started With LindaAI

Activate your license & meet your crew

Howdy, Boss. Welcome to the family. In the next 10 minutes you'll activate LindaAI, meet your 18-agent crew, and run your first command. No tech degree required — just follow the trail. Let's goooooo!

1. What you just got

LindaAI isn't a chatbot — it's a **team of named AI agents** that live right inside Claude Code on your own machine. You're the Boss. They do the work: hunting deals, running your inbox, writing your content, closing your sales, keeping your books. You own the install. Nothing's locked in someone else's cloud.

2. Activate your license

1. Unzip your LindaAI folder somewhere permanent (e.g. your Desktop)
2. Open the folder in Claude Code
3. Your license key looks like **WISE-XXXX-XXXXXXXX-YYYYYYYY-ZZZZZZZZ** — it's already baked into your install, so you're activated on first run
4. Say **"Howdy"** to LindaAI to confirm she's alive

If you ever need to re-activate or move machines, holler at support and we'll sort it.

3. Meet your crew (the short version)

You've got specialists. Call them by name or just ask in plain English — Linda routes it.

- **Bandit** — Deal Hunter (find & research deals)
- **Sheriff** — Inbox Sentinel (email triage)
- **Inkslinger** — Content Machine (posts, captions, scripts)
- **Drawl** — Copywriter (ads, sales pages)
- **Closer** — Sales Manager (pipeline, closing scripts)
- **Tally** — Data Analyst (reports, KPIs, dashboards)
- **Ledger** — Tax Filing (deductions, year-end)
- **Ranger** — Virtual Assistant (your general right-hand)

...and 10 more. Type **"who's on my team?"** anytime for the full roster.

4. Run your first command

Try one of these to feel the power:

- **/morning-briefing** — your daily CEO rundown
- **/brain-dump** — capture any idea, Linda files it right
- **/deal-analyzer** — run the numbers on a property
- **/inbox-triage** — sort your inbox (after you connect email)

Or just talk: *"Bandit, find me motivated sellers in my market."*

5. The brain folder

Drop files into your **brain/** folder — goals, deals, contacts, notes. LindaAI reads it for context across every session. The more you feed it, the sharper your crew gets.

Good first files: **goals.md**, **active-deals.md**, **contacts.md**.

6. Connect your tools

LindaAI gets stronger the more you wire up. Grab these companion guides:

- **Connect Your Email** — so Sheriff runs your inbox
- **Chat From Your Phone** — talk to Linda over Telegram
- **Let Linda Text People** — outbound SMS for sales & coordination
- **Turn On Voice** — let Linda talk back

7. The one rule

LindaAI never sends an email, text, or anything else without your OK. You approve, she fires. You're always the Boss. Now go build something. Yeeee Hawww.
